Platform- / Enterprise-Architect (m/f)

We are looking for experienced developers to join our international team! For over 10 years we have been creating state-of-the-art software for well-known domestic and international customers. As a platform-/enterprise architect, you will define specifications for core architectures, actively support our developers in their implementation and be the technical contact for customers.

We are looking for:

- 5 years or more experience with Java and JavaScript technologies,
- understanding of a wide range of technologies (web, cloud, UI),
- structured approach to analysis, technical management and documentation and
- drive to develop concepts/solutions based on customer needs.

Experience in the following areas is a plus:

- AEM or other enterprise-CMS,
- eCommerce,
- RESTful Web-Services and Microservice-architectures,
- Web-Security,
- modelling of complex software systems,
- understanding of agile development (Kanban, Scrum).

We would like to offer you:

- an office in Berlin, right in the heart of Kreuzberg
- flexibility to work partly from home
- flexible working hours; you can work full-time or part-time
- a family atmosphere. We enjoy shared lunch breaks, Friday breakfasts and regular outings together
- free coffee, beverages and weekly fruit baskets
- an attractive salary
- a personal budget to ensure you have just the right equipment you need to work with

Want to work for a well-established start-up? If so, send your cover letter and CV (either in German or English) to Manuel (jobs@pidoco.com) including your salary expectation and the number of days you would like to work per week.

If you have any further questions, get in touch with us by email or telephone +49 (0) 30 4881 6381.

We look forward to hearing from you soon!
